Having developed a solid web, database, and software development skillset and following a professional and organised approach I have resulted in a proven track record with undergraduate and postgraduate programming projects and assignments. I have completed about 10 projects and 75 assignments in two highly reputed London Universities with reviews from supervisors and personal tutors strongly recommending me as a developer.

I have wide experience of University material regarding programming with an emphasis on Web-development and Object-Oriented Programming and have successfully met University requirements and company targets.

I am highly qualified with a 1st-class BSc degree in Computer Science and a PGCert in Computer Science from, the globally top tier University, Queen Mary with strong programming, communication and teamwork skills developed through work experience as Frontend Developer. I am currently seeking a full time Frontend Developer role in a UK-based SME.

PROGRAMMING, IT and OTHER SKILLS

- Frontend development experience in HTML, CSS with Bootstrap framework, and JavaScript with jQuery and React framework on WebStorm IDE having developed an entertainment website.
- Website development experience in PHP and MVC design pattern having developed a Holiday website having flights and hotels databases as backend and a virtual assistant with the PhpMyAdmin database administration tool and the full-stack Laravel PHP framework.
- Experience with local and online relational databases, SQL and MySQL and related software, MS Access, Oracle SQL Developer, having created a database for a company hiring out audio equipment, and the non-relational database MongoDB having developed an airlines database.
- Java skills applied on timer and vehicle park manager applications written with NetBeans IDE.
- Swift skills, with iPad Assignment Planner App including a comprehensive grade calculator and a graphical indication for assignment deadlines, on Xcode IDE.
- Functional programming experience with Haskell and a podcast application.
- XSLT and XML skills, including JSON data transformation, for instance processing data from the video game Mario kart with Oxygen XML Editor.
- Experienced in Virtual Learning Environment Moodle.
- Competent in Microsoft Excel, Word and PowerPoint including reports and presentation slides.
- Git version control system.
- Attending video-recorded front-end development courses on LinkedIn Learning and solving exercises.
- Full clean driving licence.
